

ISAAC NEWTON

1642 – 1727

Scientist · Mathematician · Astronomer

The man who never stopped looking

READ THE TEXT

Paragraph numbers help you find the answers.

1 Isaac Newton was born on December 25, 1642, in England. His childhood was difficult. His father died shortly after he was born. His mother remarried and left him with his grandmother, Marjorie. Newton lived on a boring farm and spent most of his time alone.

2 His grandmother wanted him to be a farmer and take care of pigs. But Newton was not interested in farming. He preferred to watch the rain, the wind, and the grass. His grandmother did not like his “observation.” When he was 12, his mother and grandmother sent him to school. He stayed at the house of a pharmacist, Mr. Clark. There he discovered a library with books on chemistry, mathematics, and astronomy. He read many of them and learned a lot.

3 After a few years, his mother took him away from school to work on the farm again. One day, he had to guard the pigs, but he was not paying attention. He was thinking about nature and the books he had read. The pigs escaped and destroyed the crops. After this failure, his uncle William convinced his mother to send Newton to Cambridge University.

4 At Cambridge, Newton had to work as a servant to pay for his studies. He cleaned rooms and swept stairs, but he did not care. He read all the important science books of that time.

5 In 1665, something terrible happened. The plague arrived in London from ships. Thousands of people died every day. Newton left Cambridge and returned to his family’s farm. The village was safer and cleaner. There, he had time to think and observe nature again. During this time, he made his most important discoveries.

6 First, he experimented with light and colors. He bought a glass pyramid called a prism. He let a single ray of sunlight pass through it. The white light became a rainbow of many colors. He proved that white light is a combination of all colors. He also built the best telescope of his time, and the King of England congratulated him.

7 Then came his most famous idea. One day, in the garden, he saw an apple fall from a tree. He asked himself: “Why do objects fall to the ground? Is there a force that pulls them?” After many calculations and experiments, he discovered the force of gravity. He understood that the Earth attracts all objects. The apple falls because of gravity. But gravity does not work only on Earth. All bodies in the universe attract each other. The planets stay in orbit around the Sun because of gravity. The Moon attracts water in our oceans and creates tides. Gravity is like a string that holds the planets in their places.

8 Newton created three important laws of motion. With these laws and the law of gravity, he could explain how any object moves. He became the most famous scientist in the world, admired by kings and queens. He continued to observe nature and kept a telescope on his roof.

9 Today, his formulas help us build cars, bridges, and rockets for space travel. Newton said: “Remember me and my apple.” His story is the story of a man who never stopped looking and thinking.

“Remember me and my apple.”

**1 TRUE, FALSE OR NOT GIVEN***Circle T, F or NG.*

1. Newton's father died before Newton was born.
2. Newton's grandmother wanted him to become a farmer.
3. Newton enjoyed taking care of the pigs.
4. At Mr. Clark's house Newton found a library with science books.
5. Newton's uncle William was a teacher at Cambridge University.
6. Newton worked as a servant to pay for his studies.
7. Newton left Cambridge in 1665 because of the plague.
8. Newton proved that white light is made of only three colors.

APPLE GRAVITY MOTION PLAGUE PRISM PIGS SERVANT TELESCOPE

1. Newton's grandmother wanted him to take care of _____.
2. At Cambridge, Newton worked as a _____ to pay for his studies.
3. In 1665 the _____ arrived in London from ships.
4. He used a glass _____ to turn white light into a rainbow.
5. Newton built the best _____ of his time.
6. In the garden he saw an _____ fall from a tree.
7. After many experiments he discovered the force of _____.
8. Newton created three important laws of _____.

WORDS TO KNOW

observation – watching something very carefully
plague – a very dangerous illness that spreads quickly
gravity – the force that pulls objects down to the ground
tide – the rise and fall of the sea

servant – a person who works in someone else's house
prism – a piece of glass that breaks light into colours
orbit – the path of a planet around the Sun
crops – plants that farmers grow for food

**3 ANSWER THE QUESTIONS***Write full sentences.*

1. Where did Newton live when he was 12?
.....
.....
2. What happened to the pigs when Newton was not paying attention?
.....
.....
3. Who convinced Newton's mother to send him to Cambridge?
.....
.....
4. What did Newton prove about white light?
.....
.....
5. Why do the planets stay in orbit around the Sun?
.....
.....
6. What did Newton keep on the roof of his house?
.....
.....

4 MATCH THE TWO HALVES*Write a, b, c, d or e.*

- | | |
|--|---|
| 1. ☐ Newton's mother took him away from school | a. so they escaped and destroyed the crops. |
| 2. ☐ Newton was thinking about nature instead of watching the pigs, | b. and became a rainbow of many colors. |
| 3. ☐ A single ray of sunlight passed through the prism | c. and creates the tides. |
| 4. ☐ The Moon attracts the water in our oceans | d. build cars, bridges and rockets. |
| 5. ☐ Today Newton's formulas help engineers | e. to work on the family farm again. |

JOHN LENNON

1940 – 1980

Musician · Songwriter · Peace activist

A voice for peace

READ THE TEXT

Paragraph numbers help you find the answers.

- 1** John Lennon was born on October 9, 1940, in Liverpool, England. It happened during the war. He was named John Winston after his grandfather and Prime Minister Churchill. John's parents separated, and his strict aunt Mimi raised him.
- 2** When John was 15, his mother bought him his first guitar. Before that, he learned to play the banjo and harmonica. In 1956, he formed his first band, The Quarrymen. Later, this band became The Beatles. In 1957, John met Paul McCartney at a church party. They became great friends and wrote songs together.
- 3** In the 1960s, The Beatles became very famous all over the world. John sang and played guitar. In 1962, he married Cynthia Powell. They had a son, Julian.
- 4** In 1966, John said that The Beatles were more popular than Jesus. This caused a big scandal. In 1969, he returned his MBE medal to the Queen. He protested against the Vietnam War.
- 5** In 1969, John married for the second time. His wife was artist Yoko Ono. Together, they did peace actions – “bed-ins” in Amsterdam and Montreal.
- 6** In 1970, The Beatles broke up. John started a solo career. His first solo album came out in 1970. In 1971, he recorded his famous song “Imagine” about peace.
- 7** In the 1970s, John had problems with the American government. President Nixon wanted to send him out of the USA because of his anti-war views. From 1973 to 1975, John lived apart from Yoko. This period is called his “lost weekend.”
- 8** On October 9, 1975, John and Yoko had a son, Sean. It was John's birthday on the same day! After that, John did not work as a musician for five years. He stayed at home and raised his son.
- 9** In 1980, John came back to music with a new album, Double Fantasy. Sadly, on December 8, 1980, a crazy fan killed him outside his home in New York City. But John Lennon will always stay in people's memory as a great musician and a fighter for peace.

“A great musician and a fighter for peace.”

**1 TRUE, FALSE OR NOT GIVEN***Circle T, F or NG.*

1. John Lennon was born in London.
2. John was raised by his strict aunt Mimi.
3. The guitar was the first instrument John learned to play.
4. John met Paul McCartney at school.
5. Cynthia Powell sang in The Quarrymen.
6. John returned his MBE medal to the Queen in 1969.
7. John and Yoko did “bed-ins” in Amsterdam and Montreal.
8. Sean Lennon was born on his father’s birthday.

PRINCESS DIANA

1961 – 1997

Princess of Wales · Charity worker

The People's Princess

READ THE TEXT

Paragraph numbers help you find the answers.

- 1** Diana Frances Spencer was born on 1 July 1961 in England. She grew up in a large family with two older sisters and a younger brother. Her parents divorced when she was young.
- 2** Diana was a quiet and shy child. She liked music, dancing and working with children. She studied in England and Switzerland but did not go to university. Before becoming a princess, she worked with children in London.
- 3** In 1981, Diana married Prince Charles and became the Princess of Wales. They had two sons, William and Harry. Diana became very popular because she was kind, friendly and open with ordinary people.
- 4** Diana did a lot of charity work. She visited hospitals and helped sick children, homeless people and people with HIV/AIDS. She also worked to stop the use of landmines. She used her fame to talk about important problems and help people in need.
- 5** Diana died in a car accident in Paris on 31 August 1997. She was 36 years old. People still remember her for her kindness, courage and charity work. She was often called the “People’s Princess”. One of her famous quotes is: “Only do what your heart tells you.”

WORDS TO KNOW

shy – not comfortable with new people

homeless – having nowhere to live

fame – being known by very many people

courage – being brave when something is difficult

charity work – helping people without being paid

landmine – a bomb hidden under the ground

kindness – being good and friendly to other people

ordinary people – normal people, not rich or famous

“Only do what your heart tells you.”

**1 TRUE, FALSE OR NOT GIVEN***Circle T, F or NG.*

1. Diana was born in 1961.
2. Diana was the youngest child in her family.
3. Diana studied at a university in Switzerland.
4. Diana's favourite subject at school was history.
5. Before she married, Diana worked with children in London.
6. Diana and Prince Charles had two sons.
7. Diana worked to stop the use of landmines.
8. Diana was 40 years old when she died.

 500 pts – He started a solo career.

SHEET IV · THE MIXED ROUND

1 WHO IS IT? 1 L · 2 N · 3 D · 4 N · 5 L · 6 D · 7 N · 8 L · 9 D · 10 N

2 ORDER Elizabeth I → Isaac Newton → Horatio Nelson → John Lennon → Princess Diana

Numbers to write in the boxes, top to bottom as printed: 5 · 2 · 4 · 3 · 1

3 NUMBERS 1 d · 2 g · 3 a · 4 b · 5 f · 6 h · 7 e · 8 c

4 FINAL JEOPARDY No single correct answer. Accept any person if the student gives a reason *and* an example from the text.

BEFORE YOU PRINT

WILD CARD 600 – WRONG ANSWER ON THE GAME SLIDE

The board answers “Newton → Nelson → Elizabeth → Lennon → Diana”. By year of birth the correct order is Elizabeth I (1533) → Newton (1642) → Nelson (1758) → Lennon (1940) → Diana (1961). Task 2 on Sheet IV uses the corrected order.

CHILDHOOD & EARLY LIFE 300 – PRONOUN MISMATCH

The slide asks “Who was raised by *her* strict aunt Mimi?” but the answer is John Lennon. It should read *his*. Corrected in this pack.

NEWTON'S TEXT – THREE POINTS THAT DIFFER FROM THE HISTORICAL RECORD

(1) In the text the grandmother wants him to farm; historically it was his mother Hannah who took him out of school to run the farm. (2) A prism is a triangular *prism*, not a “pyramid”. (3) Newton's reflecting telescope (1671) impressed the *Royal Society*, which led to his election as a Fellow; there is no reliable source for the king congratulating him. The exercises test the text as written, so students are never marked wrong for these.

SPELLING

The Newton text uses American spellings (“colors”) while the rest of the pack and the game use British ones (“colours”). Left as in the original. Change it in *build/content.py* if you want one convention throughout.

HOW THE PACK MAPS ONTO THE GAME

Every item in tasks 1–5 on Sheets I–III#8211;5 on Sheets I–III, and every item on Sheet IV, is built on a fact that appears on the Jeopardy board, so the handouts and the game test the same knowledge. Suggested order: read the sheet → do the exercises → play the game with the texts face down.
